

How to Draw Alfie

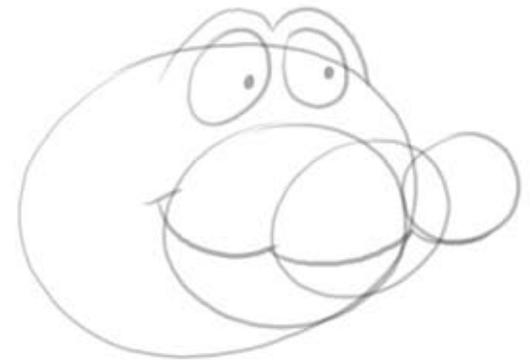

Start with a circle. It doesn't have to be perfect. It's best to do this part with a pencil so you can erase later.

Next, draw three more overlapping circles for the snout. It kind of looks like a sideways snowman doesn't it?

Draw two circle shapes for the eyes.

His mouth follows the bumps of the snout circles. Give him some eyelids and add dots for his pupils.

Now go over all the important lines with a pen or marker.

Erase your pencil lines and you're done! Don't worry if your Alfie doesn't look quite like mine. I think it's more interesting when they are a little different.
